For more  
than 50 years,  
furnishing your home

# Italian design, designed for you.

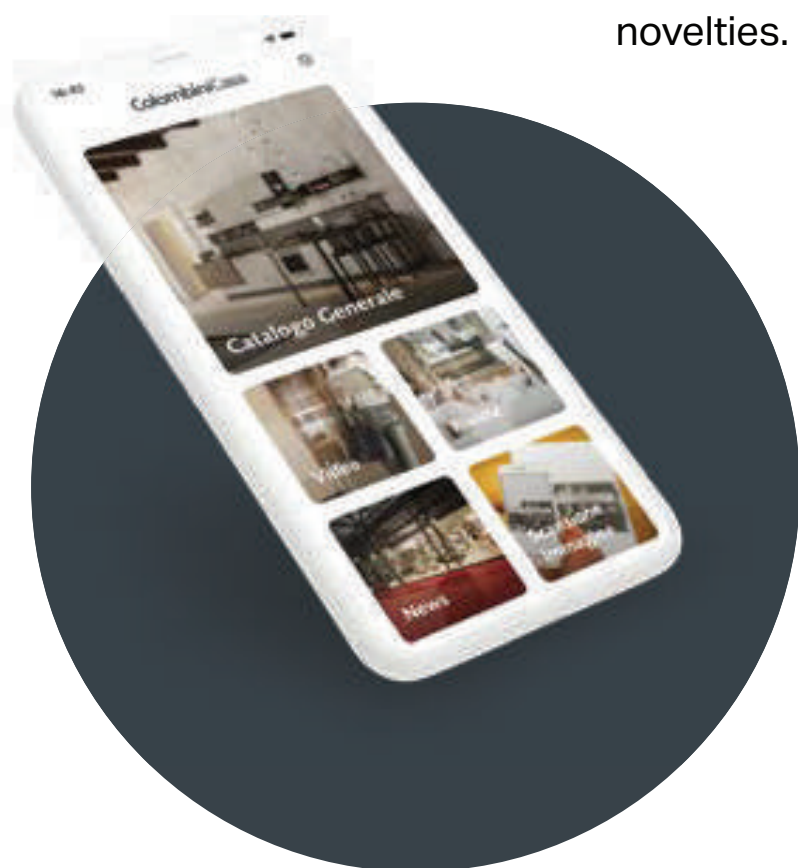

We think that Italian style is best expressed when it encounters the quality, design and flexibility required to ensure everyone achieves their ideal home. Our collections for furnishing the entire house, from kitchens to kids' bedrooms, night areas to living rooms and sofas, have drawn inspiration from this idea for over fifty years, enhancing it all with furnishing accessories. Total living which is Colombini Casa's signature philosophy has developed year by year and collection after collection with the desire to offer not only a non-standard concept, but also one that is highly customisable. The vast range of materials, finishes and colours means the solutions that become part of our customers' homes are always one-of-a-kind. "Family Line" is the name we have chosen for this way of providing a coordinated, yet flexible project for the entire home. In our stores, thanks to our products and highly specialised designers, it is possible to create your dream project and it wonderful to think that every day so many people all over the world call this project their home.
